Response to Amendment

1. Applicant's amendment filed 05/20/2005 has been entered and carefully considered.

Claims 1, 6, 8-15, and 19 have been amended.

Claims 5 and 7 have been cancelled.

Reasons for Allowance

2. Claims 1-4, 6, and 8-21 are allowed.

3. The following is a statement of reasons for the indication of allowable subject matter:

Please see the previous office action and applicant's argument filed on 05/20/2005.

Regarding claim 1, none of the prior art of record teaches or suggests the combination of a method for calibrating a marking system of at least one or more printers to maintain color consistency with a reference printer, comprising steps of: obtaining at least one reflectance value from said test patch in the printed reference by obtaining reflectance values from one or more first test patches each aligned in a first direction and obtaining reflectance values from one or more second test patches each aligned in a second direction that crosses the first direction, the second test patches having at least one patch of CMY gray extending in the second direction; creating sensor reference values for each printer of the marking system by placing the printed reference in the input tray of each printer of said the marking system transporting the printed reference through the paper path of each printer of the marking system; and

obtaining at least one reflectance value from the printed reference using the sensors of each printer of the marking system. It is these limitations as they are claimed in the combination with other limitations of claim, which have not been found, taught or suggested in the prior art of record, that make these claims allowable over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
